CS 310: Software Engineering ll
Task 5: Project Release
Due: Check Blackboard

Task:

- Project Release (**Primary Task**):
    - Clearly describe project functionality (updated SRS).
        - Remove any unimplemented functionality from the SRS.
    - Create a project installation guide for the other group.
- Test Plan (Secondary Task):
    - Design test cases for your unit testing.
    - It is a good time to think about the testing, however, Testing will be a separate task i.e., Task 6.
- Documentation (Secondary Task):
    - It is a good time to think about the project documentation, however, you will be the final document as a separate task i.e., Task 7.

Requirements and Deliverables:

- Prepare deployment document(s) for reproducibility so that you can share it with another team, and they can test your project.
- Update your SRS as needed.

Rubric:

- Reproducibility Document(s) – 80%
    - You may receive significantly less points if the other group is not able to reproduce your project with a reasonable attempt.
- Final SRS – 20%
